

HB 3000 V

Vertical Hard Bearing Balancing Machine

Specifications

Max Weight	3000 kg (6600 lbs)
Max Diameter	Depending on application
Balancing Speed	Depending on application
Motor Power	Depending on application

Accurate & High Quality Electronics

Our Vertical Balancing Machines are designed for optimum performance and durability. Several options are available depending on the customers requirement such a on board drilling and milling, pneumatic clamping, manual, semi-auto or fully auto cycles and even robotic loading and unloading. Our full featured software includes ISO1940 tolerance calculator, milling or drilling indication, Add/Remove, Tooling Zero, Tooling Compensation and many more features.
